

**SANRAD V-SWITCH 3800 MAKES FINALIST FOR THE 2008  
"CONNECTIVITY PRODUCT OF THE YEAR" AWARD BY STORAGE  
MAGAZINE, THE UK'S LEADING IT PUBLICATION**

*SANRAD's leading iSCSI SAN solution recognized for excellence and innovation in the UK storage industry.*

**MOUNTAIN VIEW, Calif. – April 14, 2008** – SANRAD, Inc. a market leader in open iSCSI SAN solutions, today announced that the SANRAD V-Switch 3800 has been named a finalist for this year's prestigious "Connectivity Product of the Year" award by Storage Magazine, the UK's top IT storage publication. In its fifth year, the 2008 Storage Awards, also known as "The Storries," recognize innovation and success in the UK storage industry.

According to Storage Magazine, "The Storage Awards is where once again the readers of Storage magazine will reward the outstanding products and services for which our industry has become a byword."

Winners are determined by votes from readers. To vote for SANRAD, go to <http://www.storage-awards.com/>. Click on "Vote Now" from the menu selection on the page. Scroll down to "Connectivity Product of the Year." Choose (or tick) SANRAD V-Switch 3800 and submit your vote.

A black tie dinner on June 5, 2008, at The Tower Hotel in London, England, will celebrate winning storage industry individuals and organizations with industry-wide recognition before an audience of their peers and the media.

SANRAD V-Switch 3800, an open scalable solution with integrated StoragePro software, provides SAN connectivity and storage virtualization for any physical or virtual server. Its Global Data Replication (GDR) software also provides enterprise-class disaster recovery across data centers and remote offices connected by local, metropolitan or wide area IP networks.

"SANRAD is very pleased to receive this finalist nomination from Storage Magazine," said Kim Tchang, SANRAD's vice president of marketing. "Our V-Switch solutions uniquely enable IT managers to manage any storage, any physical or virtual server, anywhere. This recognition from the number one storage publication in the U.K. is a testament to SANRAD's innovative approach to SAN connectivity."

**About Storage Magazine**

Storage Magazine is the UK's only dedicated storage publication with independent up-to-the-minute news about products and services within the storage industry. Launched in November 2001, Storage Magazine focuses on all issues relating to IT storage for over 20,000 IT directors, managers and decision makers. Storage Magazine delivers facts on genuine Storage issues such as Disaster Recovery, Raid, Back-up, NAS & SAN, Fibre

Channel, Servers, IP Storage, Disk Devices, Components, Storage Management and Security. For more information, visit: <http://www.storagemagazine.co.uk>.

### **About SANRAD**

SANRAD transforms the way that enterprises implement and manage storage solutions by providing any physical or virtual server with low-cost, robust SAN connectivity and management. SANRAD delivers intelligent storage networking switches with integrated virtualization, management, and disaster recovery services. SANRAD V-Switch and unique software technology provide open, high-availability solutions optimized for storage consolidation and server virtualization.
